Turner Exhibits serves architects and designers by developing custom fabrication solutions for unique projects. Small, interdisciplinary teams collaborate to evaluate solutions, design, plan, and carry out the production of each project. We seek individuals who value collaboration and who have a strong work ethic, a love of problem solving, and passion for fine craftsmanship.

To pursue employment at Turner Exhibits, please send your resume via email to resumes@turnerexhibits.com. No phone calls, please.

When submitting a resume, make sure electronic documents can be opened and printed from either Microsoft Word or Adobe Acrobat. To apply for a specific opening listed below, please identify the position in your cover letter. General applications are always welcome even when no position opening is listed.

Open position at Turner Exhibits: **Fabrication Project Manager**

Turner Exhibits seeks an experienced project manager to plan and manage custom fabrication of our spectacular kinetic architecture and exhibit solutions. Familiarity with custom fabrication and construction methods is required. This position is responsible for contributing to estimating and for defining and managing project scope, timeline, and budget. Candidates must have excellent organization and communication skills, and must effectively foster collaboration by participants across the design, fabrication, and installation disciplines. Familiarity with mechanical and/or electronic control systems is a plus. Valid driver's license, automobile liability insurance, and passport are required, as project managers must travel locally, nationally, and internationally to site meetings, customer presentations, and installations as required. This is a permanent position with benefits. Wage DOE.

Open position at Turner Exhibits: **Installation Project Manager**

Turner Exhibits seeks an experienced Project Manager to plan and lead the installation of kinetic architecture systems and exhibits at sites throughout the United States and Canada. Working closely with our design and production teams, this position is responsible for planning shipping, material handling, installation means and methods, and on-site integration at a wide range of job sites, including museum, business, commercial, and residential sites. Candidates must be experienced interpreting architectural drawings, performing layout at job sites, leading diverse installation crews, and defining safe and effective methods of installation. Candidates must have excellent collaboration, planning, communication and problem-solving skills. Familiarity with mechanical and/or electronic control systems is a plus. A strong candidate has fabrication and rigging experience, site installation experience, great organizing skills, and a calm, effective communication style. Valid driver's license, automobile liability insurance, and passport are required, as project managers must travel locally, nationally, and internationally to site meetings and installations as required. This is a permanent position with benefits. Wage DOE.
